# Hazardous Area Guarding

**Industrial Safety Fencing** has a large range of standard components developed utilising years of experience gained in process automation. The high level of flexibility of our stocked products range of posts, panels, single doors, twin door and sliding doors allow the freedom to quickly establish a safe working environment to Australian standard 4024.1. The modular design allows the safety fencing to conform easily to the irregularities of existing plant and equipment with the freedom to be reconfigured or relocated.

# Hazardous Area Guarding
